Office of Intelligence.

THE dispersed situation of those who are established in the City of Washington, renders intercourse and communication difficult and embarrassing, not only to themselves but to those who visit it, whether on business or for the purpose of settling. A variety of domestic and familiar facts are necessary to be acquired, and yet the acquisition of them sometimes costs more labor, attention and expence, than matters of higher consequence. Hence in particular, many persons of moderate resources have greatly suffered, being under the immediate necessity of engaging in measures, and at the same time unprepared with the requisite information. It is on this account that the subscriber has been induced to offer to the patronage of the public an office of Intelligence. In this office, those who reside in George Town, Alexandria, or the City of Washington, may at any time be informed of real property in any of those places either improved or unimproved entered here for sale: for which entries he keeps a regular set of books. Those who approve of this design in this particular, are requested to transmit him a designation of their property, and terms for the information of applicants. Persons who have houses to rent, and those being desirous of hiring houses will here find a greater mass of intelligence on that subject than they can derive from any other source. He has opened also, a set of books where persons desirous of employing others in any capacity whatever may soon learn of those who will be willing to serve them, and the latter, on the other hand, will be enabled to learn of those, who wish to employ them. Strangers arriving at the metropolis may apply here for almost any kind of information whether in private or public business; and information will either be given or seasonably procured for them; horses and carriages will be received on commission for private sale, and personal property of any description whatever; bills of sale and other instruments of writing will be correctly and handsomely executed. The public must be well assured than an institution of this kind cannot prove generally useful without general encouragement.—That general encouragement the subscriber pledges himself to exert himself to deserve. Some charge will be made for every real information imparted, but as exorbitancy is always disgraceful, and the nature of such an institution requires moderation, he holds himself bound to give no dissatisfaction on that score.
