Theroz Fuel

THEROZ is the quickest, safest, most efficient means of getting hot food and drinks ever devised.

Made by an absolutely new and patented process that converts a liquid into a solid—not a paste—

"THEROZ is the only form of which we know that will not go liquid while burning." This means it can't upset and spill and set fire to anything—it's safe.

The U. S. Government Chemist states: "For any given amount THEROZ offers 20% more British Thermal Units of heat than the best of the paste alcohols—THEROZ is completely consumed, leaving no residue."

This means THEROZ is quicker, hotter—more economical—it's all heat.

The THEROZ FIELD STOVE and THEROZ FOOD HEATER burn Theroz Fuel packed solid in half-pound cans. The THEROZ MESS KIT burns Theroz Fuel Cubes—solid cubes about 1 in. square.

Put your Fuel Problems—heating—cooking—general fuel saving—up to our Experimental Research and Technical Laboratories. The service is yours for the asking—however large your problem—however small—in business or home.

Theroz Food Heater

Designed for Aeroplane, Hospital, Trench, and Transportation Service. Height 17 1/4", diameter 11 1/4". Weight 27 lbs., capacity 16 quarts.

The outer wall of the Heater is made of galvanized iron. This holds a large container of tin into which fit four aluminum containers—one 4-quart container and three containers holding 2 quarts each.

Test made with one 8-oz. can of Theroz—9 A. M. water in large tin container 125° in four small containers 125°. At eleven o'clock water in large container 200°, water in the three 2-quart containers 190°, water in the 4-quart container 170°.

The can of Theroz, which heats the food and keeps it hot for two hours, is held securely by a spring in the bottom of the Heater.

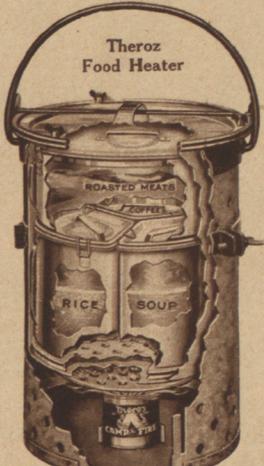

The Theroz Food Heater is ideal for hospitals where food has to be carried from ward to ward, and in trench or field where food has to be carried for any distance.

Theroz Field Stove

The Pennsylvania Railroad terminal at 32nd to 33rd street and 7th avenue is used every day by about 70,000 people—going and coming.

We can accommodate only a very few of these 70,000 people—not more than 600—two in every room (we have only 300 rooms)—but we want the whole 70,000 to know about the Belleclaire.

That's the reason we advertise. We want them to know what complete service we are able to give them.

Big bedrooms, big windows, big bathrooms, big portions of food, big portions of courtesy, big desire to please.

The only thing "small" about the Belleclaire is the price charged for the quality of the service given.
