NATIONAL INTELLIGENCER.

The appearance of the NATIONAL INTELLIGENCER has been protracted to this day, by the announced, though unannounced, arrangements attending the removal of a Printing Office.

There is truth in the declaration the venerable COLUMBUS of 1774, who in their address to the Inhabitants of Quebec, speaking of the freedom of the press, say 'The importance of this condition, besides the advancement of truth, science, morality, and the arts in general, is its diffusion of liberal sentiments on the administration of government, its free communication of thoughts between subjects, and its consequential assertion of opinion among men, whereby oppressive measures are exposed, and are terminated into more honorable and just modes of conducting affairs.'

But while the Editor differs with our dearth regards the Liberty of the Press, he is decidedly inimical to its licentiousness.

As in the conduct of public men, and the tendency of public measures will be freely examined, so, on the other, private citizens will remain inviolate, nor shall insinuations or expressions be admitted, however dilapidated by fact or enhanced by wit.

will be formed, as it ought to be, from the instance in which the National Intelligence has been conducted. It will be purely American. It will be his object to promote the true interests of his own Country, untrammelled either by party or by prejudice or omnia.

The NATIONAL INTELLIGENCER shall be printed three times a week on good paper, and with a new type. The annual subscription shall be Five Dollars paid out in advance.

The Editor of the NATIONAL INTELLIGENCER, impressed with the great importance of the crisis, and desiring to see the country united in a common cause, has determined to publish a paper, that may claim the reputation of being the most judicious, useful, and correct political paper, that has determined to enter upon the arduous duties which such an object involves.

With respect to the National Intelligence, another plan will be pursued. Over a faithful and comprehensive detail of facts will be given, and the conduct of public men, will be examined with candour and truth.
