How to relieve chapped skin

Learn how you can keep your skin soft and smooth in even the coldest, windiest weather

A famous skin specialist says about chapping that "The lowered humidity of the air in winter intensifies the dryness of the skin, causes it to crack and break."

No matter how rough and dry your skin may have become, you can now make it soft and smooth at once.

Every normal skin needs a protective cream.

Pond's Vanishing Cream affords a perfect protection. Its base is a wonderful skin-softening ingredient which has a special affinity for the skin.

Its immediate action on rough, dry or chapped skin is so decided that every woman comments on it the first time she tests it. It contributes to the skin just the properties necessary to keep it fresh and pliant.

Applied before going out, it keeps the skin from becoming dry and rough, and does not promote the growth of hair on face or hands.

It protects the skin from wind, from dust, from the drying effect on the skin of living in hot houses. It shields the skin so completely, so successfully that its

regular use will eliminate practically all of the ordinary complexion troubles.
