## Increase Your Hours for Leisure

Electrically driven labor-savers are breaking down the old tradition that "woman's work is never done." Now, cleaning-day and wash-day are over in less time than it used to take to get well started

### EASY Vacuum Electric WASHER

Manufactured by Syracuse Washer Corporation, Syracuse, N. Y.

With the EASY VACUUM ELECTRIC WASHER, full of hot, steaming suds, you switch on the current and see your weekly wash finished in the space of minutes.

Then, with the electrically driven wringer, you shift the clothes from suds to rinse, from rinse to bluing, and then into the clothes basket—and your spotless wash is on the line in an unbelievably short time.

But best of all, your finest lingerie, sheerest fabrics, delicate laces, cannot come to harm in the EASY VACUUM ELECTRIC WASHER, nor can the heaviest bath mat or rag rug dampen its ardor for hard work.

Clothes are not rubbed, dragged, jerked or tumbled in this more scientific and efficient washer. Two vacuum cups move up and down forcing the cleansing suds through the fabric with as much ease as water passes through a sieve.

### AMERICA Electric Vacuum CLEANER

Manufactured by Wise-McClung Mfg. Co., New Philadelphia, Ohio.

The AMERICA ELECTRIC VACUUM CLEANER glides smoothly over your carpets, curtains and upholstery. The extra powerful suction takes the dirt out of them and deposits it in the dust-proof bag—and your house-cleaning is over in a jiffy.

This is the Vacuum Cleaner that gets all the lint and threads, all the dirt and other litter, for it has the most powerful suction—and its divided spiral brush will not clog with foreign matter.

You can count on the AMERICA for long and steady service. It is built to stand hard work and lots of it—and to stay in order.

AMERICA special features insure your comfort in operation. It starts or stops with a touch of the foot. The non-shock wooden handle can be adjusted at any angle.

It is the ultimate Vacuum Cleaner for the up-to-the-minute housekeeper.
