Does Your Butter Taste Like Butter?
Or does it taste like onions, cheese, bananas, or anything else which may have been near it in your refrigerator?
Food flavors and food odors do not mix in a
BOHN SYPHON REFRIGERATOR
With the Bohn Siphon System of rapid air circulation, moisture cannot condense except in the ice chamber. It is moisture condensing on the food in an ordinary refrigerator that causes odors and flavors to mix and food to spoil. The air in a Bohn Siphon Refrigerator is so dry that you can strike a match on the inside wall of a food chamber. You can leave soda crackers in a Bohn indefinitely and take them out crisp and crumbly. Put your refrigerator to such tests and see what happens!
Call and let us tell you about the Siphon System, the Dryness of the Air, the One-Piece Round-Cornered Lining of fused Porcelain Steel, the wonderful Flaxinum Insulation that holds temperature to 42° (guaranteed), cutting down ice bills. If you cannot call, write for our handsome catalog.

The dining rooms in a hotel tell the story of the character of the people who patronize it.
Meal time is a good test of whether men and women are really worth while.
People who talk loud, who bowl out the waiters, who lack in table manners are not desirable patrons for a hotel like the Belleclaire.
It is easy enough to pick out the people who are accustomed to the proprieties of life.
One very great attraction of the Belleclaire is that its dining rooms are not patronized by boisterous or ill-mannered people.
Come in and have a good meal some time and take note of the environment. You will dine with the right kind of people.
